Education

Noida Institute Of Engineering and Technology - CGPA : 7.28

B.Tech in Computer science and Artificial Intelligence

Nov. 2022 – June 2026

greater noida, Uttar Pradesh

Raj Kamal Saraswati Vidya Mandir - Percentage: 84%

Class XII (CBSE Board)

2021

Dhanbad, Jharkhand

Raj Kamal Saraswati Vidya Mandir - Percentage: 90.8%

Class X (CBSE Board)

2019

Dhanbad, Jharkhand

Technical Skills

- **Languages:** Java, Python, SQL
- **Technologies / Frameworks:** Spring Boot, REST APIs, Bootstrap, GenAI, Machine-Learning
- **CS Fundamentals:** Data Structures and Algorithms, OOPs

Experience

Orbitor

July 2025 – August 2025

Data Science Intern

- Built **Titanic Survival** and **SMS Spam Classifier** models using Python with data preprocessing and feature engineering.
- Applied **Scikit-learn**, **Pandas**, **NumPy**, and **NLTK** to train and evaluate models using Logistic Regression, Random Forest, and XGBoost.
- Performed **EDA and model evaluation** using accuracy, precision, recall, and F1-score.

Projects

SpendSmart | *Python*

- An **AI-powered expense tracking system** using **Python**, **Streamlit**, **SQLite** with **real-time data processing** and financial insights.
- Built and deployed a **Random Forest model** on live data for **expense forecasting**, Category wise predict and smart budget recommendations.
- Implemented **NLP-based auto-categorization** and developed **interactive dashboards** (**Matplotlib**, **Streamlit**) to visualize spending patterns and trends.

E-Commerce Web Application | *Spring Boot*

- Developed a full-stack E-Commerce web application using **Spring Boot**, implementing **RESTful APIs** for product, cart, and order management.
- Implemented secure **authentication and authorization** using **Spring Security** and **JWT**, enabling role-based access control and protecting critical APIs.
- Integrated **Stripe payment gateway** and used **Spring Data JPA** for database operations.

AI Study Assistant | *Python, Streamlit, LangChain*

- Developed an **AI-powered Study Assistant** enabling intelligent document interaction and personalized learning using **LLMs**.
- Implemented **Retrieval-Augmented Generation (RAG)** using **vector embeddings** and **ChromaDB** for context-aware question answering.
- Built features like **PDF upload**, **AI chat interface**, **practice question generation**, and **research assistant** to enhance student productivity.
- Designed a modular **multi-agent architecture** using **LangChain** for tasks like summarization, Q&A, and content generation.

Certifications

Python for Data Science, AI and Development

IBM, Coursera

JavaScript Essentials

Infosys Springboot

SQL and Databases for Data Science

Coursera
